Subject index

A23187
effects on oocyte penetration by hamster spermatozoa, 199
Accessory sex glands
hamster, and fertility, 107
Acid hydrolases
human, and sperm surface, 43
Acrosome reaction
human, effects of A23187 and pentoxifylline, 199
human, effects of antioxidants, 225
Adenosine triphosphate
human, levels in spermatozoa, 13, 19
human, and sperm motility, 19
Alcohol
human, and disorders of the testis, 292
α-glucosidase
human, and sperm-zona binding, 121
Androgen-binding protein
rat, expression of gene, 149
Androgens
and testicular descent, 281
human, abuse of, 57
human, cardiovascular effects, 57
human, dermatoligical effects, 57
human, liver effects, 57
human, musculo-skeletal effects, 57
human, psychiatric effects, 57
Antibiotic treatment
human, and IVF outcome, 127
Anti-sperm antibodies, 135, 181
Azoospermia
human, and fertility potential, 140

Cadherins
human, expression in testis and epididymis, 174
Cadmium
human, in seminal plasma and relation to smoking, 24
Calcitonin gene-related peptide and testicular descent, 281
Capacitation
human, effect of hydrogen peroxide, 300
Carcinoma-in-situ
human, expression of *c-kit* in, 85
Catalase
human, effects on spermatozoa, 225, 300
Centrifugation swim-up
human, selection of spermatozoa, 225
Cervical mucus penetration test, 181
Chlamydia trachomatis
human, infection and infertility, 9
Cloning of genes
dog, in epididymis, 314
Coagulum proteins
human, isolation from semen, 63
Computer-assisted semen analysis
human, 1, 115, 169
mouse, 271
Creatine phosphokinase
human, activity in spermatozoa, 13
Cryopreservation of spermatozoa
human, 19, 115, 169, 289
human, effect of swim-up, 115
Cryptorchidism
human, 281
human, fine-needle biopsy of, 35
human, lapatoscopic diagnosis of, 74
rat, effect on magnetic resonance spectroscopy, 161
Cyclic protein-2
rat, expression of gene, 149
Cystatin-C
rat, expression of gene, 149

Dithiothreitol
human, effects on spermatozoa, 225
DNA flow cytometry
human, use in analysis of testicular biopsies, 29, 35
DNA packaging in hamster spermatozoa, 256
Dolichyl phosphomannose synthase rat, in Sertoli cells, 50

Efferent ducts
dog, gene expression in, 324
Embryos
hamster, preimplantation and accessory sex glands, 107
Epididymis
dog, region-specific gene expression, 324
dog, sperm maturation in, 314, 324
hamster, sperm maturation in, 256
human, and α-glucosidase activity in seminal plasma, 121
human, aspiration of spermatozoa from, 140
human, comparison of gene expression with dog epididymis, 314, 324
human, expression of N- and E-cadherins in, 174
mouse, sperm maturation in, 271
rat, effect of hypothyroidism on lipids in, 262
rat, protein synthesis and secretion by, 205
Epididymal obstruction
human, evaluation of testicular biopsies, 29, 140
European Academy of Andrology, 113

Fertilization
hamster, and accessory sex glands, 107
hamster, and site of aspiration of epididymal spermatozoa, 256
FSH
hamster, and Sertoli cell function, 93
human, levels in men with hypo-gonadotrophic hypogonadism, 241
human, levels in oligozoospermia, 192
FSH receptors
hamster, and Sertoli cell function, 93

Genitofemoral nerve
role in testicular descent, 281
Gubernaculum
role in testicular descent, 281

hCG
human, effects of treatment with, 192, 241
Heating of testes
human, evaluation as a contraceptive method, 186
Hormones and spermatogenesis, 214
Hydrogen peroxide
human, effects on sperm capacitation, 300
Hyperactivation
human, effects of antioxidants, 225
Hyperprolactinaemia, rat, 143
Hypogonadotrophic hypogonadism, 241
Hypothyroidism
rat, effect on sperm number and function in, 262

Infertility
and cryptorchidism, 281
human, and infection, 9, 127

human, and sperm antibodies, 135
human, induction for contraception by mild testicular heating, 186
α-inhibin
rat, expression of gene, 149
In-situ hybridization
dog, 314, 324
rat, 149

Lactate dehydrogenase
human, levels in spermatozoa, 13
Lactate dehydrogenase-X
human, levels in spermatozoa, 13
Laparoscopy
human, diagnosis of intra-abdominal testes, 74
Lead
human, in seminal plasma in relation to smoking, 24
Leucocytes
human, in semen, 127, 135
human, numbers in semen in relation to IVF outcome, 127
Leydig cell function
human, in relation to idiopathic oligozoospermia, 192
LH
hamster, and photoperiodic changes in the testis, 93
human, levels in idiopathic oligozoospermia, 192
Lipid peroxidation
human, effects of pentoxifylline on induction of in spermatozoa, 308

Magnetic resonance spectroscopy
rat, relation to testicular composition, 161
Micropuncture
rat, of seminiferous and epididymal tubules, 205
Mitochondrial function
hamster, and sperm function, 256
Müllerian-inhibiting substance and testicular descent, 281

Neoplasms of human testis, 85

Oligozoospermia
human, 13, 192
human, and hormone levels, 192
human, Leydig cell function in men with, 192
Oocytes
sperm binding to zona of, 121
Ornithine decarboxylase
rat, activity in seminal vesicles, 143

Pentoxifylline
hamster, and acrosome reaction, 199
hamster, interaction with A23187 and oocyte penetration, 199
human, and sperm cyclic AMP levels, 169
human, and sperm lipid peroxidation, 169, 308
human, effect on sperm motility and survival, 1, 169, 199
Percoll preparation of spermatozoa
human, 13, 19, 68, 225
Photoperiod
hamster, and Sertoli cell function, 93
Platelet-activating factor
human, and sperm function, 169
Polyspermy
hamster, and accessory sex glands, 107
Prolactin
rat, effect on ornithine decarboxylase in seminal vesicles, 143
Proliferating cell nuclear antigen
and germ cell multiplication in rodents and primates, 214
Protein synthesis and secretion
rat, by seminiferous and epididymal tubules, 205

Residual bodies
rat, artifactual localization of mRNAs, 149
Retinol
rat, effects on glycoprotein synthesis by Sertoli cells, 50
Rhodamine-123
hamster, staining of spermatozoa with, 256

Seminal plasma
human, coagulum proteins in, 63
human, heavy metal levels in relation to smoking, 24
human, serine proteases in, 232
Seminal vesicle fluid, human, 232
Seminiferous tubules
rat, protein synthesis and secretion by, 205
Serine proteases
human, and sperm motility inhibitors, 232
Sertoli cells
hamster, and germ cell numbers, 93
hamster, stereological analysis of, 93
human, 29, 35
rat, effects of retinol on glycoprotein synthesis by, 50
Sertoli cell-only syndrome
human, 35
human, and alcohol intake, 291
Sexual differentiation, 281
Spermatocytes, 35
expression of proliferating cell nuclear antigen in, 214
human, expression of N-cadherin in, 174
Spermatogenesis
human, disorders related to alcohol intake, 291
human, evaluation by biopsies, 29, 35
human, induction with gonadotrophins, 241
human, in patients with spinal cord injury, 29
Spermatogonia
expression of proliferating cell nuclear antigen in, 214
human, expression of N-cadherin in, 174
Spermatids, 29, 35 174
Spermatozoa
human, acrosome reaction of, 78, 199, 225
human, effects of temperature on motility of, 289
human, effects of superoxide dismutase, 225
human, evaluation by flow cytometry, 78
human, measurement of LDH, LDH-X, CPK and ATP levels in, 13
human, morphological analysis of, 248
human, motility after cryopreservation, 169
human, motility inhibitor, 232
human, outer dense fibres in, 68
human, quality in relation to smoking, 24
mouse, epididymal changes in motility, 271
rat, function in hypothyroidism, 262
rat, N-acetyl-β-D-glucosaminidase and, 43
Steroid abuse, human, 57
Sulphated glycoproteins
rat, gene expression, 149

Testes
control of descent of, 281
human, diagnosis of intra-abdominal testes, 74
human, evaluation of biopsies of, 29, 35, 140
human, germ cell tumours of in relation to expression of c-kit, 85
human, volume of, 241
Testosterone
human, and steroid abuse, 57
human, levels in oligozoospermic men, 192
rat, effect of hypothyroidism, 262
Transferrin
rat, expression of gene, 149
Transition protein-2
rat, expression of gene, 149

Urine
human, use in detection of *Chlamydia trachomatis*, 9

Vas deferens
human, analysis of spermatozoa from in vasectomized men, 181
Vasectomy, 181

Zinc
human, in seminal plasma in relation to smoking, 24
